MALAYSIAN IDENTITY FEDERATION AND ACCESS MANAGEMENT (MYIFAM)

Suhaimi Napis
InfoComm Development Centre
Universiti Putra Malaysia
Points

- MyIFAM is in the process of becoming member of Asia Pacific Grid Policy Management Authority and International Grid Trust Federation (ISGC 2012 end of the month)
- Becoming Certification Authority for Malaysia (Only One CA for each Country, hope it can translate to a single Mandate)
- Extending to Identity Management and Federation
- Steps to encourage universities groups of smaller IHLs to have LDAP/AD
- Also extending to Research Institutions…
Europe Model or US InCommon Model
AAF is (to me) the most appropriate approach: Seed funding and develop sustainable business from there.

Services:
- Grid Computing Resources
- Library services
- MYREN CLOUD services (OnDemand Servers and Storage, etc)
- Learning Materials
- etc
