

## **REFEDS Updates**

Nicole Harris

2 June 2013, REFEDS Annual Meeting

- RFC proposed text completed and in correct format for submission.
- Text is on REFEDS wiki if you'd like to read (very dull).
- Next steps – discussion at IETF in Berlin??
- QUESTIONS??

## UPDATE ON BASELINE ASSURANCE

Please see work on REFEDS wiki at:

Overview: [https://refeds.terena.org/index.php/LOA\\_for\\_RANDE\\_Federations](https://refeds.terena.org/index.php/LOA_for_RANDE_Federations)

Discussion topics: [https://refeds.terena.org/index.php/Discussion\\_topics](https://refeds.terena.org/index.php/Discussion_topics)

Entity Categories:

<https://refeds.terena.org/index.php/>

[Entity Categories: Summary of attribute release requirements](#)

TODAY: consensus on work going forward for possible FOP and entity category work.

- MET1 developed by Yaco Sistemas to provide basic overview of federation metadata, based on idea from Brook Schofield.
- Call for MET2 sent out in April, to develop the following features:
  - Fix problems with metadata refresh.
  - Enable federated sign-on for the tool.
  - Better support for entities in multiple federations.
  - Allow tables to be sortable by column heading.
  - Enhancements to the the 'most federated' list.
  - Display MDUI DisplayName where available for entities.
  - Enhanced editable fields for federations enabling federations to tag.
  - Make use of visual graphics for each display screen.
  - Enable a comments field for each entity.
  - Support for request to federations / entities.

- Call period now finished, proposals in and will be evaluated by the Steering Committee.
- Work on MET2 to be carried out over next few months.
- Service will then be implemented at TERENA.
